

CANVAS PRINT CARE INSTRUCTIONS

We want you to enjoy your canvas print for many years to come so please follow these instructions;

- Handle your canvas print with care to protect against scuffs and scratches.
- If there is any dust on the canvas, brush it off as gently as possible with a duster.
- Never use a damp cloth or any cleaning fluids on the surface of your canvas print.
- The pigmented inks are lightfast for 75 years, however we recommend that you do not hang your picture in direct sunlight if possible.
- As with all works of art - and even furniture - it's best to avoid exposing canvas prints to extreme humidity.
- Avoid hanging canvas prints in places such as cellars or attics, where the humidity may affect the wood.
- Avoid exposing the canvas print to extreme temperatures. In particular, take care if you're hanging canvas prints above radiators or fireplaces. Check that the canvas and wood aren't warping or burning because of the heat!
